## *Hitch Arrangements For Moto-Tugger To Cart*

There are various hitches that can be welded or clamped to existing carts. The slide clamp tubes fit underneath the cart to provide receiver tube at both ends of cart. *Model 4752* is for carts 40" - 55" long. *Model 4753* is for carts 56" - 76" long. Custom tubes are also available.

### **The Male Hitches**

The Male Hitch end slides into the receive tube and has a safety latch for towing. *Model 4750* is for carts with 5" or 6" casters and *Model 4755* is for carts with 6" or 8" casters.

### **Cart to Cart Hitch End**

Model 4754 is used between carts when pulling multiple carts.

### **Moto- Cart Receiver Tube**

This Receiver (*4756*) is designed to fit our standard Moto-Cart *Models MC-105, MC-10M and MC-10L*, allowing the Moto-Cart to become a tugger as well as a platform cart.

**\*\*Must order hitch 4754 to tow carts.**

Contact our factory for assistance determining the proper hitch for your specific requirements. Also, visit [www.liftproducts.com](http://www.liftproducts.com) for more Moto-Cart information.
