

Moto-Tugger HD

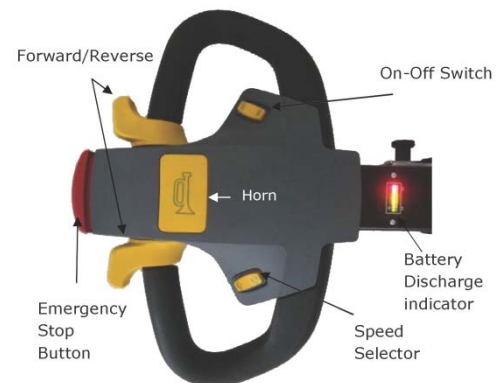

The Moto-Tugger HD is an ergonomically-designed motorized tow vehicle used to pull a variety of single or multiple carts in a safe and efficient manner with very little effort from the operator. The Moto-Tugger HD is designed to handle heavier loads than the standard Moto-Tugger with a capacity of 3,500-5,000 lbs. depending on the caster size of the carts being pulled.

Model	MC-TG-HD
Capacity	3,500-5,000 lbs.
Width	24"
Length	35.81"
Weight	400 lbs. less hitch

Features:

- Articulated Transaxle Drive with gas shocks for superior traction on uneven floors
- 24 volt electrical system with variable speed
- High/low switch controls top speed
- Three-position handle for ideal ergonomic control placement
- 9" pneumatic non-marking tires
- LED battery indicator gauge
- Horn
- (4) 12v 35AHr Deep Discharge AGM sealed batteries
- On-board automatic charger
- (2) 3-1/2" non-marking casters (with an option for dual wheeled caster) for large crevices such as elevator entry and exit
- Control handle and control head pull down for ease of operation
- Easy to adjust control handle assembly in three positions

Ergonomic Control Handle

In addition to the pull-down position for normal operation, the Moto-Tugger HD features an easily adjustable three-position control. With the different height of operators and the variety applications the three-position handle allows for the best ergonomic position for any application.
